

The International Centre for Missing & Exploited Children receives major donation from Safer Society Group

Back in August we shared that ICMEC had received a major donation from Safer Society Group, a company focused on developing technologies with the aim of creating a safer and better global society. Safer Society Group, the parent company of NetClean and Griffeye, agreed to donate Griffeye Analyze DI, a platform that supports digital media investigations and streamlines the process of reviewing online child abuse images.

When we combine global strength and knowledge, the investments of our donors and this type of state-of-the-art technology, ICMEC is provided with a solid foundation to tackle the rapidly growing problem of child sexual abuse and exploitation.

Join us in thanking the Safer Society Group for their commitment and dedication to building a safer world. Their generosity is making a difference in lives of children globally.

“

Thanks to the donation of the Griffeye Analyze DI technology, we will have long-term access to a groundbreaking solution for law enforcement. We are so grateful for Safer Society Group's generous donation and will put Griffeye Analyze DI to great use supporting our mission.
